

BILLING POLICY

IN HOSPITAL

This practice does not charge the rates that the Department of Health has unilaterally determined for doctors, and which are known as the Reference Price List ("RPL").

The fees charged by this practice can be up to three times the RPL.

The RPL prices for services are available from the Department of Health (Tel: 012-312 0000) and the Health Professions Council of South Africa (Tel: 012-338 9300) and www.doh.gov.za.

You, as a member of a medical scheme, remain fully responsible for payment of the Doctor's account until fully paid. The Doctor's services and his contract are with you as the patient and not with the medical scheme.

The fees charged by the practice may be different to the benefit to be paid by your medical aid/scheme, and you as the patient is responsible for any co-payment resulting from any difference between these two amounts.

The fact that the practice may submit a claim to the medical aid/scheme, Compensation Commissioner, Road Accident Fund, or an insurer, will not in any way relieve you of any liabilities as previously mentioned.

The patient will receive a quotation for the planned in Hospital procedure.

The patient will be liable for payment of legal fees incurred by the practice in recovering any amount due (including but not limited to tracking costs and collection fees) on Attorney and own client scale.

The Doctor reserves the right to charge for all follow-up consultations post-operatively, irrespective of whether it is in the rooms, the ward, high care, or the intensive care unit.

OUT OF HOSPITAL

An administration fee of R300 will be charged for all first-time patients.

The practice will submit the consultation, sonar, uroflow, urine test and any other materials used on you as the patient to the relevant medical aid/scheme for payment on behalf of the patient.

If your medical aid benefits are exceeded, you are liable to pay the full amount in the practice on the same day of your appointment.

Patients who only have a hospital plan, must pay the full account in the rooms on the day of the appointment.

Private patients must pay the full account in the rooms on the day of the appointment.

International medical aids and medical insurances - those patients are managed as private patients and must pay the full account on the day of the appointment.

MEDICAL SCHEME BENEFITS

I, the undersigned, do hereby:

Accept the billing policy as above explained.

Warrant that, as indicated, I and/or the patient is a current, paid-up member or dependent of such member under the medical aid/scheme, the patient has not resigned and that the services have not been terminated.

Authorize the practice to submit the account to the relevant medical aid/scheme for payment on behalf of the patient.

Give permission for the use of ICD-10 codes, for more effective account payment by the medical scheme.

I undertake to:

Ensure that accounts are received by the medical aid/scheme and paid within 90 days of service. I acknowledge that an account older than 3 months will not be settled by the medical aid/scheme and I will be held responsible for the settlement of the account.

Settle the account within 30 days in case of non-payment or short payment by the medical aid/scheme.

Acknowledge that pre-authorization for treatment / services does not guarantee payment by the medical aid/scheme, and that it remains my responsibility to obtain such authorization if required by my medical aid/scheme.

Disclosure of medical information:

I authorize the practice to disclose to the medical aid/scheme or the Compensation Commission or the Road Accident Fund or insurer to whom a claim has been submitted, in relation to amounts payable to the practice, full details as to the nature, diagnosis, condition, or treatment of the patient.

I confirm that the responsible person and/or patient has been informed that in certain circumstances, such as disclosure of ICD-10 codes, the exact consequences of disclosing such information are unknown to the practice and that information relating to such consequences, must be obtained by a responsible person and/or the patient from the third party to whom the information is disclosed.

Practitioners should have patients sign disclaimers that would protect them from liability claims that may result from patients contracting the disease after a visit to the practice.
